Subject: Dimock Sampling Data

All,

Per our discussion on the call yesterday morning, Region 3 has shipped a CD with the Dimock data to Ralph's home address for review. Since the package may not arrive to

Ex. 6 - Personal Privacy

 until Friday, we've found a way to share the data electronically in the mean time without putting everyone's inboxes over quota, and there will be more time for everyone to take a look through the data.

Using the Environmental Science Connector tool, I have created a Dimock "project workspace" where I uploaded all the data that was mailed on the CD to Ralph. More files can be added as necessary, and only those that I specify will have access to the workspace (e.g. those on this email).

If you haven't used this tool before, here's what will happen: You'll get an email saying you were invited to the Dimock Workspace. Click the link that says "Accept invitation," which will take you to a page that confirms your acceptance. Once you've done that, go to <http://portal.epa.gov/ESC>, where you may have to enter a user name and password. Enter your LAN user name and password to log in, and you should see the Dimock Workspace there to click on. All the data documents we discussed this morning are in this space. It should be relatively straightforward, but if you have any issues getting access to the workspace, please let me know. For Region 3 folks, it is also on the share drive at **L:\Share\Water Protection Division\dimock**

Thanks,
Christina Catanese
